About

Raven has lived on the streets his whole life. A thief perhaps but never a liar. He's walked into every day without a plan for the future.

He loves women but respects every aspect of them. Sarcasm may be his defense mechanism, but he believes in true loyalty and the power of patience.

Real cigarettes are his guilty pleasure.

His secret.

Only one tattoo,
a black raven
on his neck.

growth from the inside.
He loves with his whole
heart so pain hits him
harder than most.

Nuts and bolts like the
pieces of her life: in chaos.

THE UNIVERSE BELONGS
TO THOSE WHO READ

About

Dr. Atlas is a genetic genius who wants to save the world from incurable and deadly diseases by finding a superhuman healing gene within us.

The problem is he sees us all as expendable--simply as Testers--because every loss of human life is just another step toward the end goal of saving the world.

But, will his supernatural gene save humanity, throwing us into a wild spin of evolution, or will he destroy us all?
